Orality and Literacy—Monoskop

Orality is thought and verbal expression in societies where the technologies of literacy are unfamiliar to most of the population. The study of orality is closely allied to the study of oral tradition. The term "orality" has been used in a variety of ways, often to describe, in a generalised fashion, the structures of consciousness found in cultures that do not employ, or employ minimally, the technologies of writing. Walter J. Ong's work was foundational for the study of orality, and ...

As Walter Ong observes in *Orality and Literacy*, the way we communicate — whether it be through voice, writing, or print — changes how we think and behave. "Writing, in the strict sense of the word, the technology which has shaped and powered the intellectual activity of modern man, was a very late development in human history.

Despite this stance of Parry and Lord, it has been claimed - many times and in many ways - that the Parry-Lord "theory" is founded on a hard-and-fast distinction between orality and literacy. These claims stem from unfamiliarity with the ethnographic dimension of Parry's and Lord's work, and, more generally, from ignorance about the observable mechanics and esthetics of oral traditions.

Gregory Nagy: Orality and Literacy

Generally, "literacy" is understood as the ability to read and write, while "orality" describes the primary verbal medium employed by cultures with little or no exposure to writing. A "great divide" is sometimes posited between them, assigning to each certain cognitive, social, and cultural characteristics.

Though disputed, all sides agree that orality is the predominant mode of communication in the world and that literacy is a relatively recent technological development in human history. Pieter J.J. Botha Orality as a condition exists by virtue of communication that is not dependent on modern media processes and techniques. It is negatively formed by the lack of technology and positively created by specific forms of education and cultural activities. . . .

Orality (Communication)—Definition and Examples

In Walter Ong's *Orality and Literacy*, he noted the differences between literate and illiterate cultures. Ong emphasized speech being the primary and more vital language used as opposed to written texts. Although speech is still prominent over writing, this current "high technology" age gives writing more weight on a scale of importance.

Like all technologies, literacy has the potential to deepen our appreciation of the world and ourselves. But it also has the potential to alienate us from lived reality. While homo sapiens started speaking language as long as 60,000 years ago, it only began writing down its speech within the past three or four thousand years of its history.
