The smallest penguin species is the little blue penguin (*Eudyptula minor*), also known as the fairy penguin, which stands around 33 cm (13 in) tall and weighs 1 kg (2.2 lb).

*Penguin - Wikipedia*

The little penguin has the plainest, least distinctive plumage of all the penguin species but may have been the first one to evolve from flying birds. Birders who learn more facts about these tiny members of the Spheniscidae bird family can better appreciate their uniqueness, even if these penguins don't show it in appearance.
