This volume addresses the fraught relationship between market and society in times of social and economic crisis, exploring how they interact in key social, cultural, and political arenas on a global scale. The contributors examine the neoliberal market in anthropological and ethnographic terms to question whether "market logic" has won out against social aspects of human existence in a framework of minimal state protection and the devaluation of human labor. Fruitfully combining empirical data and theoretical approaches, the volume investigates the extent to which ordinary people accept unequal allocations of resources and examines their sense of belonging in an expansive neoliberal economy.

Il «pensiero snello» non è e non può essere ridotto a banale metodologia organizzativa e questo volume ci spiega perché. L'approccio della «lean production» e del Toyota production System è una vera e propria filosofia che affonda le radici nello zen. Affinché il «lean thinking» dia i suoi frutti occorre andare in profondità e scoprirne le origini filosofiche e culturali, perché solo così la dimensione applicativa potrà incarnare una nuova ed efficace cultura d'impresa. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Helvetica}
