Low Pressure Boilers Workbook 3rd Edition - amazon.com
If your pressure gauge is marked with a green zone and the needle has fallen below it, this is a sign that the gas boiler pressure is too low and action should be taken. If you have radiators that fail to heat up as they should, this may also be a sign that there is an issue with your boiler pressure and can be confirmed by checking the gauge.

What to do if your boiler pressure is too low | Viessmann
If the pressure is below 1 bar, then your boiler is likely to have low pressure. What to do if your boiler has low pressure Once you know that the drop in pressure hasn't been caused by a leak, or a leak has been fixed, you can re-pressurise your boiler to bring it back to the normal level (1 bar) | check the instructions that came with your boiler to find out the boiler pressure ...

What Causes Low Boiler Pressure? Find out & Fix | Boiler Guide
If your boiler pressure reads less than 1 bar, it's possible that you might have lost water from the system, which needs to be replaced. This is where that filling loop (or filling link) comes in again! If the pressure gauge on your boiler indicates high pressure (above 2.75 bar), then you may need to bleed a radiator to bring the level down to around 1.5 bar. This can be tricky and, occasionally, dangerous; due to high water temperatures.
