examines the elusive element behind so many innovative breakthroughs in fields ranging from physics and marketing to design and popular culture. Combining unusual simplicity and surprising power, elegance is characterized by four key elements—seduction, subtraction, symmetry, and sustainability. In a compelling, story-driven narrative that sheds light on the need for elegance in design, engineering, art, urban planning, sports, and work, May offers surprising evidence that what's "not there" often trumps what is. In the bestselling tradition of *The Tipping Point*, Made

This book is a collection of papers that address a fundamental question: What is the role of civil justice and civil procedure in the various national traditions in the contemporary world? The book presents striking differences among a range of countries and legal traditions, but also points to common trends and open issues. It brings together prominent experts, professionals and scholars from both civil and common law jurisdictions. It

represents all main legal traditions ranging from Europe (Germanic and Romanic countries, Scandinavia, ex-Socialist countries) and Russia to the Americas (North and South) and China (Mainland and Hong Kong). While addressing the main issue - the goals of civil justice - the book discusses the most topical concerns regarding the functioning and efficiency of national systems of civil justice. These include concerns such as finding the appropriate balance between accurate fact-finding and the right to a fair trial within a reasonable time, the processing of hard cases and

the function of civil justice as a specific public service. In the mosaic of contrasts and oppositions special place is devoted to the continuing battle between the individualistic/liberal approach and the collectivist/paternalistic approach - the battle in which, seemingly, paternalistic tendencies regain momentum in a number of contemporary justice systems.

These poems were written by a retired physician who had never had any experience as a professional writer. He had always had a love of poetry, but didn't have the time to pursue this endeavor. He learned early on that he had an aptitude for poetic writing. He was encouraged by his wife and many close friends who read some of his first poems. These poems cover a large range of events which could be encountered in life. The poems are encompassing enough that people from many cultural and ethnic

backgrounds should be able to find them quite interesting. They are not based in totality on any specific occurrences which the author encountered. His life as an Afro- American, growing up in the South during the era of Segregation and during the Great Depression did have a great influence on his writing.
