## ~~Head bolt torque specs for mahindra bolero~~

They might have torque sticks in between the driver and the socket, but those are not known for accuracy. They could easily be wandering around within the 25% band between 93 ft\*lb and 116 ft\*lb. More likely is that the fasteners are actually beyond the torque spec, but as long as they don't yield and/or don't come loose everyone's happy.
