Revised edition of the authors's Managerial accounting, 2014.

The emphasis of Managerial Accounting, 8e is on teaching students to use accounting information to best manage an organization. In a practice Hilton pioneered in the first edition, each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. Known for balanced examples of Service, Retail, Nonprofit and Manufacturing companies, Hilton offers a clear, engaging writing style that has been praised by instructors and students alike. As in previous editions, there is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting and performance evaluation.

The emphasis of Managerial Accounting, 12th edition, is on teaching students to use accounting information to best manage an organization. Consistent with the practice Hilton pioneered in the first edition, each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. Known for balanced examples of Service, Retail, Nonprofit and Manufacturing companies, Hilton/Platt offers a clear, engaging writing style that has been praised by instructors and students alike. The 12th edition of Managerial Accounting offers significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting and performance evaluation.

Value creation is at the heart of an economic enterprise, defining its capability to serve customers and generate profits and growth. This fact has led to an ever-increasing set of tools and techniques that start with customers, focusing on serving their preferences from the very inception of a product until its disposal. And this data is required to implement a value creation approach that has its roots in the Management Accounting System (MAS). The resulting model is called the Value-based Cost Management System (VCMS). If you or any manager want to take the lessons you learned in product development, process management, and marketing, this book will help you extend this knowledge to your MAS. This book makes this transformation both logical and easy to implement, with a focus on the new types of information that can be garnered when the MAS is modified to fit the value creation approach. The authors of the book will provide, upon request, a simplified automated data collection template that will ease the implementation process.
