Using a multi-country panel of banks, we study whether better capitalized banks experienced higher stock returns during the financial crisis. We differentiate among various types of capital ratios: the Basel risk-adjusted ratio; the leverage ratio; the Tier I and Tier II ratios; and the tangible equity ratio. We find several results: (i) before the crisis, differences in capital did not have much impact on stock returns; (ii) during the crisis, a stronger capital position was associated with better stock market performance, most markedly for larger banks; (iii) the relationship between stock returns and capital is stronger when capital is measured by the leverage ratio rather than the risk-adjusted capital ratio; (iv) higher quality forms of capital, such as Tier 1 capital and tangible common equity, were more relevant.

Shows marketers everywhere how to put the powerful principles of lifestyle marketing to work making money for their organizations. Explains the best ways to connect with customers' attitudes, beliefs, and aspirations through effective, sensitive campaigns to fight world hunger, save the rain forests, and sponsor arts and music festivals.

Mike Neary's account finds itself set in a particular moment of time: between the student protests and urban riots that erupted in England in 2010-2011 and the 2017 General Election, during which students and young

people played a significant role by protesting the politics of austerity and by supporting the politics of Corbynism. The revolutionary curriculum in this book is framed around unlearning the law of labour and the institutions through which the law of labour is enforced, including the capitalist university which, more and more, seeks growth and expansion for the sake of growth, neglecting the intellectual and educational needs of students in favour of the needs of the capitalist state. Through thought experiments and reference to the work of the Soviet legal theorist, Evgeny Pashukanis, *Student as Producer* searches for solutions to how cooperatives might be brought about by a sense of common purpose and social defense. This is a practical, probing response to the ongoing assault on higher education by the social power of Money and the State. Mike Neary grounds his answers in a version of Marx's social theory known as 'a new reading of Marx', as advanced by authors such as Werner Bonefeld and Moishe Postone. The theory is applied to various aspects of pedagogy, criminology, and political sociology to create a curricula for revolutionary teaching that will aid activists and those involved with co-operative movements who are seeking ways in which to engage critically with higher education.

Small and medium-sized enterprises (SMEs) dominate the market in terms of sheer number of organizations. Their role in the business world is difficult to overstate. Despite this, there is a high failure rate among smaller organizations, which can be explained to a significant degree by a lack of marketing understanding in this sector. Introducing the importance of marketing to entrepreneurial firms this book guides the student through the fundamentals of marketing within the SME context, providing a more value-added learning experience than your standard marketing run-through. The authors deal directly with "people issues" (i.e. everyday entrepreneurial marketing interactions) to prepare students for the "dragon 's den" of entrepreneurialism. This new and lively textbook provides a fresh and unfettered approach for marketing students who require a more real-world understanding of the impact of their discipline on entrepreneurial firms. The growing student body involved with studying entrepreneurship will also benefit from the customer insight offered by this approach.
