I have owned this book since I took my first undergraduate mathematical physics course in 1972. Since that time, however, I have not really found Mathews and Walker to be terribly useful. My problem is that it is difficult for me to learn to use mathematical methods if they are presented without proof.

Fizika matematike - Wikipedia
In mathematics, a Green's function is the impulse response of an inhomogeneous linear differential operator defined on a domain with specified initial conditions or boundary conditions.. This means that if L is the linear differential operator, then . the Green's function G is the solution of the equation LG = δ , where δ is Dirac's delta function;; the solution of the initial-value problem ...
