communicating it effectively to pupils, other teachers and parents. Written by an expert author team with over 50 years' combined classroom experience, Busy Ant Maths is a flexible, whole-school mathematics programme that ensures conceptual understanding and mathematical fluency from the start. "

The United States is increasingly dependent on information and information technology for both civilian and military purposes, as are many other nations. Although there is a substantial literature on the potential impact of a cyberattack on the societal infrastructure of the United States, little has been written about the use of cyberattack as an instrument

of U.S. policy. Cyberattacks--actions intended to damage adversary computer systems or networks--can be used for a variety of military purposes. But they also have application to certain missions of the intelligence community, such as covert action. They may be useful for certain domestic law enforcement purposes, and some analysts believe that they might be useful for certain private sector entities who are themselves under cyberattack. This report considers all of these applications from an integrated perspective that ties together technology, policy, legal, and ethical issues. Focusing on the use of cyberattack as an instrument of U.S. national policy, Technology, Policy, Law and

Ethics Regarding U.S. Acquisition and Use of Cyberattack Capabilities explores important characteristics of cyberattack. It describes the current international and domestic legal structure as it might apply to cyberattack, and considers analogies to other domains of conflict to develop relevant insights. Of special interest to the military, intelligence, law enforcement, and homeland security communities, this report is also an essential point of departure for nongovernmental researchers interested in this rarely discussed topic.

coloring pages. There are NO duplicate images in this book.- The pages are single-sided to prevent bleed-through, and so that pages can be removed and displayed without losing an image on the back.- We have carefully designed each page to be entertaining and suitable for children in the 4 to 8 year-old age range. We have avoided overly-intricate designs as well as overly-simplistic ones. We believe children of this age love coloring fun scenes that fire up their imaginations, not a book full of simple shapes.- The pages are a nice, large 8.5x11 size

This book comprises chapters featuring a state of the art of research on digital technology in mathematics

education. The chapters are extended versions of a selection of papers from the Proceedings of the 13th International Conference on Technology in Mathematics Teaching (ICTMT-13), which was held in Lyon, France, from July 3rd to 6th. ICTMT-13 gathered together over one hundred participants from twenty countries sharing research and empirical results on the topical issues of technology and its potential to improve mathematics teaching and learning. The chapters are organised into 4 themed parts, namely assessment in mathematics education and technology, which was the main focus of the conference, innovative technology and approaches to mathematics education, teacher education and

people know about; flowers can brighten someone's day when they are feeling down. But, one group of flowers, the orchids, didn't love themselves enough to grow. They thought they were ugly and that no one would want to buy them! The orchids start to shed their insecurity after the other flowers tell them to focus on their happy feelings. But, will they? You'll want to have this book in your collection to read again and again. Just wait until you see what happens to the little flower at the end! Flowers in the Shop sprouts seeds that flowers are nature's prizes, and they, like people, grow in all shapes, colors, and sizes.
