The Mazda RX8 is a great performance car for a relatively low cost. Rather than your conventional engine, the RX8 has a rotary engine and as you may know, rotary engines can suffer from flooding relatively easily. Once you have a flooded RX8 they can seem impossible to start, but in the article below I will show you how to start a flooded RX8 Mazda without the huge mechanic bill.

~~Flooded RX8 ? Hot To Start a Flooded RX8 Mazda Fast~~  
The rotary engine of a Mazda RX8 tends to saturate easily if the car turns off before the engine warms. Flooding the cylinders by injecting excessive fuel into the combustion chamber causes the fuel/air ratio to become disproportionate. When this happens, ignition cannot occur, and the engine cannot start. Dealing with this quirky problem in your Mazda RX8 can be frustrating; often steps taken to try to start a flooded car will only aggravate the issue.

~~How to fix a flooded engine on a 2004 Mazda RX8~~  
Hot start problems (signs of poor compression), Growling noise and loss of power (sticking SSV or tune valves), Engine Management Light flashing whilst driving (real time detection of engine misfire), Rattling Exhaust (catalyst damaged with ceramic in rear section of exhaust), Won't rev past 5000rpm approx. (Damaged catalyst blocking exhaust).

~~Common issues to watch and care for on the Mazda RX8~~  
If the engine is flooding my compression will show lower than if it wasn't. So I may have to turn the engine over w/o plugs to evaquate the fuel from the rotor housings, before a compression test. Motor has just over 40k miles. If the compassion shows good I may pull the UIM to test injectors for a leak down test.
