"Mind Maps" offer a simple and visual way to record the main points of a subject and show their inter-relationships. Key words are presented in the context of learning pathways that connect to form maps of each topic. The topics encompass every aspect of pathology-from basic principles to disease mechanisms and pathology related to specific body systems. Facilitates study with easy-to-remember key words and visual representations of their inter-relationships. Promotes a fuller understanding of how concepts relate to one another, making it easier to retain the material and priming the brain to process further information on each topic (the "semantic prime" effect). Encompasses every aspect of pathology-from basic principles to disease mechanisms and pathology related to specific body systems.

"MedMaps for Pathophysiology contains 102 concept maps of disease processes and mechanisms. The book is organized by organ system and includes classic diseases such as hypertension, diabetes, and congestive heart failure, as well as complex diseases such as lupus and HIV. Each concept map is arranged to visually capture and clarify the relationships between various aspects of each disease, such as biochemical and genetic causes and responses."--PUBLISHER'S WEBSITE.

The Mind Maps is unique organizational tool helps you study and review the fundamentals of clinical Biochemistry easily and effectively. This book is an instructional tool for teaching Clinical Biochemistry to medicine, pharmacy, health sciences students and pathology residents or for preparing for examinations. Clinical Biochemistry focuses on the laboratory diagnosis and prognosis of the most common diseases by organ system and relates diagnostic testing to the pathophysiology of the diseases in development of the differential diagnosis. Whether you are following a problem-based, an integrated, or a more traditional medical course, clinical biochemistry is often viewed as one of the more challenging subjects to grasp. What you need is a single resource that explains the integrates laboratory findings with clinical practice. You will find all this, and more, in the first edition of Mind Maps in Clinical Biochemistry. Mohamed J. Saadh Hala M. Sbaih

The Practitioner's Path in Speech-Language Pathology: The Art of School-Based Practice bridges the gap between theory and practice, evidence-based practice and practice-based evidence, and the science and artistry of speech-language pathology. This book takes a critical look at areas related to wellness, professional development, and growth that can impact the personal self along with the professional self. It examines each area through an overview of inter-disciplinary research in addition to personal narratives illustrating key principles and strategies and offers the reader a professionally balanced perspective. The first section of the book helps us understand the importance of building a foundation for our clinical path through a discussion about scientific and evidence-based principles, different types

of knowledge systems, and development of wisdom. The second section of the book helps us understand the importance of supporting our foundation through an introduction to reflection, counsel and care, balance and harmony, growth and detachment. The third section of the book includes chapters that serve as pillars of practice: organizational frameworks, materials and activities, measuring progress, best practices, and the importance of community. The fourth and final section of the book highlights shared vision, clinical expertise, emotional intelligence, leadership trends, the scholarship of teaching and learning, and research dissemination. This book challenges us to consider our own perceptions about the explicit nature of professional practice, and facilitates the development of four attitudes that can have a profound impact on both clinical success and professional satisfaction: a scientific attitude, a therapeutic attitude, a professional attitude, and a leadership attitude. It contains a blend of clinical evidence and research, practitioner views, common sense, philosophical stances, and historical overviews. The Practitioner's Path in Speech-Language Pathology is designed for students and practitioners who are actively involved with the process of knowledge acquisition, and targets issues we encounter along our path to becoming reflective practitioners, as they relate to the excellence behind and scholarship within teaching and learning.
