then use it to help plants grow as it will be jam-packed with super nutrients! All you need for a successful compost heap is waste, air and water! How to get started

How to make compost | Wildlife Watch

In order for the compost process to work, it requires four things: Food - Aim for a 50/50 mix of 'greens' (young, wet and sappy waste) and 'browns' (old, dry, brittle, more fibrous waste). Air - All living organisms in your compost bin need air to breath. Brown material is usually good at providing these organisms with air pockets.
