Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine

mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

Comprehensive and controversial, this book critically examines Japan's economic presence in Asia.

Pounder ' s Marine Diesel Engines and Gas Turbines, Tenth Edition, gives engineering cadets, marine engineers, ship operators and managers insights into currently available engines and auxiliary equipment and trends for the future. This new edition introduces new engine models that will be most commonly installed in ships over the next decade, as well as the latest legislation and pollutant emissions procedures. Since publication of the last edition in 2009, a number of emission control areas (ECAs) have been established by the International Maritime Organization (IMO) in which exhaust emissions are subject to even more stringent controls. In addition, there are now rules that affect new ships and their emission of CO2 measured as a product of cargo carried. Provides the latest emission control technologies, such as SCR and water scrubbers Contains complete updates of legislation and pollutant emission procedures Includes the latest emission control technologies and expands upon remote monitoring and control of engines

This book explores Japanese investment in Europe and Southeast Asia, in relation to the automobile industry. In Part I the authors examine industrial organization and policy issues in Thailand, Malaysia, The Philippines and Indonesia, looking at Japanese investment and the relative policy successes and failures in these host countries. Part II looks at skill formation systems in the Japanese dominated automobile industry in Southeast Asia and in Part III the authors focus on the EU and the very different influence of Japanese investment.

This book deals with the systems of cost reduction that originated in Japan. These are mostly new systems that did not exist in western practices before they were utilized in Japan. The book also presents the Japanese ways of carrying out the globally popular cost reduction practices.(1) It describes the strategic cost management conducted by top management through alliances between companies and/or between government and industry.(2) It shows the functional cost reduction systems along the various phases of the product life cycle, as follows: R&D ? Product development ? Manufacturing ? Administration and indirect operations(3) It conducts some humanistic or behavioral aspects of Japanese cost reduction systems.

Facing Asia examines the political and economic processes of regionalism and regionalization in Asia with a focus on Japan and Japanese actors. The articles by eminent scholars address the forces that tie the region together. They treat topics ranging from Japanese bilateral and multilateral ODA and the activities of state and non-state actors on the regional level to issues such as Japanese multinational corporations, foreign direct investment in Asia, and regional financial institutions. Methodologically, the authors draw on disciplinary strengths in either the social sciences or economics while organizing their treatment around a shared political-economic perspective. By looking at Asia through an interdisciplinary lens, the volume offers something to anyone interested in Japanese involvement in the politics and economics of the region. In the final chapter, the editors weave together the different approaches to Japan's place in Asian regional cooperation in the 1990s and beyond.
