What began as a solution for transportation has evolved into a desire for speed, luxury, personal expression, and freedom. For many, the thrill of the drive has eclipsed the pure utility of the automobile. And the pursuit of that thrill is the driving force behind 365 Cars You Must Drive. From the Ford Model T to the Porsche Carrera GT, there are certain cars that any self-respecting auto enthusiast just has to know—and experience from the driver's seat. With homage to the greatest cars and good-natured mockery of the strangest, authors Matt Stone and John Matras detail which cars to drive and why, how to get behind the wheel, where to drive them, and who to invite along for the ride. Each entry contains a colorful spec box noting the car's claim to fame, a Did You Know? factoid, the author's clever suggestions for "The Perfect Passenger" and the "Soundtrack" coming out of the speakers, Behind the Wheel notes, and a "Perfect Drive" for the marque or model covered. Engine details, production information, the price when it debuted and the collectible price now - all of it adds up to at-a-glance fun reading to go with informative essays on each car, archival and full-color photos, and more. See Motorbooks author Matt Stone interviewed by Jay Leno on JayLenosGarage.com: <http://www.jaylenosgarage.com/video/jays-book-club-matt-stone/1164286/>

The Escort RS Cosworth, which began rallying in 1993, was one of the most ingenious designs of all time, and eventually became Ford's most successful model since the legendary Escorts of the 1970s. The combination of Cosworth power, four-wheel-drive transmission, and an effective aerodynamic package made it a Rally Giant in all conditions, and, until the all-new Focus WRC was launched in 1999, this generation of Escorts was the most effective rally car that Ford had ever produced.

This book explains how the HF 4WD evolved over the years – first into the Integrale with its original 8-valve engine, then the Integrale 16V, and ultimately into the Integrale 16V Evo 1 (or 'Deltona', as it was affectionately known). This compact, five-door Lancia dominated world-class rallying for six years, winning innumerable events, World Championships for Drivers, and World Championships for Manufacturers. Alongside the cars, driving heroes such as Markku Alan, Didier Auriol, Miki Biasion, Juha Kankkunen and Carlos Sainz also became legendary in this period.

First released in 2007, the bestselling Transport Revolutions argued that land transport in the first half of the 21st century will feature at least two revolutions. One will involve the use of electric drives rather than internal combustion engines. Another will involve powering many of these drives directly from the electric grid - as trains and trolley buses are powered today - rather than from on-board fuel. Now available for the first time in paperback and updated with the most recent data, it sets out the challenges to our growing dependence on transport fuelled by low-priced oil. These challenges include an early peak in world oil production and profound climate change resulting in part from oil use. It proposes responses to ensure effective, secure movement of people and goods in ways that make the best use of renewable sources of energy while minimizing environmental impacts. Synthesizing engineering, economics, environment, organization, policy and technology in a detailed yet highly readable style, Transport Revolutions is essential reading for anyone working, studying or interested in transport and the environment.
