The combustion equipment and control systems of our auxiliary boilers are based on C-heavy oil basic specifications designs. We recommend adding specifications for combustion MGO (Marine Gas Oil) which contains less sulphur than C-heavy oil to your boilers. This method helps reduce SOx and CO2 emissions.

Mitsubishi Power steam turbines are a result of more than a century of R&D and manufacturing experience. Our highly reliable and efficient steam turbines have undergone strict in-house testing and quality management procedures to meet the diverse requirements of our global customer-base.

## Mitsubishi Power, Ltd. | Steam Turbines

The marine boiler shown is top-fired with resulting improved gas distribution over the entire superheater furnace. Both the main-bank tubes and superheater elements are in-line for improved tube cleaning. Normally, soot-blowing equipment includes retractable blowers in the superheater and rotary blowers in the main bank and economizer.
