Surprising rules for successful monetization Innovation is the most important driver of growth. Today, more than ever, companies need to innovate to survive. But successful innovation—measured in dollars and cents—is a very hard target to hit. Companies obsess over being creative and innovative and spend significant time and expense in designing and building products, yet struggle to monetize them: 72% of innovations fail to meet their financial targets—or fail entirely. Many companies have come to accept that a high failure rate, and the billions of dollars lost annually, is just the cost of doing business. Monetizing Innovations argues that this is tragic, wasteful, and wrong. Radically improving the odds that your innovation will succeed is just a matter of removing the guesswork. That happens when you put customer demand and willingness to pay in the driver seat—when you design the product around the price. It's a new paradigm, and that opens the door to true game change: You can stop hoping to monetize, and start knowing that you will. The authors at Simon Kucher know what they're talking about. As the world's premier pricing and monetization consulting services company, with 800 professionals in 30 cities around the globe, they have helped clients ranging from massive pharmaceuticals to fast-growing startups find success. In Monetizing Innovation, they distil the lessons of thirty years and over 10,000 projects into a practical, nine-step approach. Whether you are a CEO, executive leadership, or part of the team responsible for innovation and new product development, this book is for you, with special sections and checklist-driven summaries to make monetizing innovation part of your company's DNA. Illustrative case studies show how some of the world's best innovative companies like LinkedIn, Uber, Porsche, Optimizely, Draeger, Swarovski and big pharmaceutical companies have used principles outlined in this book. A direct challenge to the status quo "spray and pray" style of innovation, Monetizing Innovation presents a practical approach that can be adopted by any organization, in any industry. Most monetizing innovation failure point home. Now more than ever, companies must rethink the practices that have lost countless billions of dollars. Monetizing Innovation presents a new way forward, and a clear promise: Go from hope to certainty.

Molte aziende hanno ormai compreso che i social network in generale, e Facebook in particolare, sono diventati ambienti che è impossibile non presidiare. Il problema sta nel fatto che difficilmente riescono a farne una reale risorsa di business. Come raggiungere i nostri attuali e potenziali clienti? Come farsi conoscere in modo mirato, acquisire contatti e incrementare le vendite? In questa quarta edizione del libro ti racconto come funziona davvero Facebook per le aziende, come ottimizzare la tua Pagina e i tuoi post, come creare un Facebook Marketing Plan di successo che ti aiuti a raggiungere risultati concreti e come utilizzare per il business il social network più amato al mondo. Se sei un professionista della comunicazione, un marketing manager, un digital o social media marketer o se vuoi fare del marketing su Facebook la tua professione, questo è il libro giusto per te.

A recovering Mad Man throws down the ultimate challenge to his profession: Innovate or die. The ad apocalypse is upon us. Today millions are downloading ad-blocking software, and still more are paying subscription premiums to avoid ads. This \$600 billion industry is now careening toward outright extinction, after having taken for granted a captive audience for too long, leading to lazy, overabundant, and frankly annoying ads. Make no mistake, Madison Avenue: Traditional advertising, as we know it, is over. In this short, controversial manifesto, Andrew Essex offers both a wake-up call and a road map to the future. In *The End of Advertising*, Essex gives a brief and pungent history of the rise and fall of Adland—a story populated by snake-oil salesmen, slicksters, and search-engine optimizers. But his book is no eulogy. Instead, he boldly challenges global marketers to innovate their way to a better ad-free future. With trenchant wit and razor-sharp insights, he presents an essential new vision of where the smart businesses could be headed—a broad playing field where ambitious marketing campaigns provide utility, services, gifts, patronage of the arts, and even blockbuster entertainment. In this utopian landscape, ads could become so enticing that people would pay—yes, pay—to see them. Praise for *The End of Advertising* “New York media types aren’t quick to pass up a party, even one celebrating a book that predicts their demise. . . . The future of marketing will need to rely on creative, innovative models, Mr. Essex wrote, pointing to *The Lego Movie* and New York’s Citi Bike bicycle-share program as promising examples.”—*The New York Times* “A rabble-rousing indictment of the ad industry from one of its own. Essex predicts that success will depend less on the ability to annoy and more on the capacity to create and entertain.”—Adam Grant, *New York Times* bestselling author of *Originals* and *Give and Take* “Fresh and timely, *The End of Advertising* is an eye-opening take on the current media landscape. And along with it, Essex provides a road map for how brands can reinvent themselves and navigate this new world.”—Arianna Huffington “In this dynamic little book, Essex challenges brands—even those of us who pride ourselves on thinking outside the box—to think bigger still. He’s got me thinking.”—Neil Blumenthal, co-founder of Warby Parker “Mandatory reading for anyone who wants to

A captivating journey through the hidden libraries of Jerusalem, where some of the world's most enduring ideas were put into words In this enthralling book, Merav Mack and Benjamin Balint explore Jerusalem's libraries to tell the story of this city as a place where some of the world's most enduring ideas were put into words. The writers of Jerusalem, although renowned the world over, are not usually thought of as a distinct school; their stories as Jerusalemites have never before been woven into a single narrative. Nor have the stories of the custodians, past and present, who safeguard Jerusalem's literary legacies. By showing how Jerusalem has been imagined by its writers and shelved by its librarians, Mack and Balint tell the untold history of how the peoples of the book have populated the city with texts. In their hands, Jerusalem itself—perched between East and West, antiquity and modernity, violence and piety—comes alive as a kind of labyrinthine library.

This book explores how Asia's fast-growing cities can fulfil their potential as engines of economic prosperity and provide a livable environment for all citizens. But for this to happen, major challenges that reduce urban communities' quality of life and economic opportunities must be addressed. These include poor planning, a lack of affordable housing, inequalities, pollution, climate vulnerabilities, and urban infrastructure deficits. The book's 19 articles unwrap these challenges and present solutions focused on smart and inclusive planning, sustainable transport and energy, innovative financing, and resilience and rejuvenation.
