- Mr. Link's Math Classes

Two possible solutions
satisfy this equation,

$y = -32 - \sin(x)$ and

$y = +32 - \sin(x)$, but only the
first one of them satisfies

the initial condition $y(0)$

$= -32$. Therefore, $f(x) = -32 - \sin(x)$.

Notes: 1. The

statement $f(0) = -32$ is

incorrect and could result

in lost points. 2. The

domain of this solution is

all real numbers.
