Physiology 09a Lab Activity  
The Muscular System The main  
function of the muscular  
system is movement. This  
includes walking, breathing,  
pumping the heart, and  
moving food through your  
digestive tract, just to  
name a few important  
examples. Muscles also  
create heat as they  
contract,

Odor and Food Receptors

Smell and taste are

important senses capable of  
alerting us to danger within  
the environment, while at  
the same time allowing us to  
find pleasure in food and  
scents. These special senses  
are closely linked, and in  
fact our sense of taste  
would be quite boring

Then there's the matter of the mental state of the person receiving the information: When someone recently wrote to The Ethicist asking whether he should share with an emotionally fragile relative that his mother's death had been a suicide, for example, Appiah urged caution. "STEP FOUR: CHANGE YOUR MIND, MAYBE SEVERAL TIMES. BREATHE."
