www.hort.iastate.edu

Chemistry has lost one of its giants – Professor François Diederich
passed away on September 23. François was a well-known organic
chemist, with incredibly broad research interests that included
carbon-rich acetylenic scaffolds, supramolecular chemistry, molecular
recognition in chemistry and biology, medicinal chemistry, and
organic materials.

Journal of Physical Organic Chemistry - Wiley Online Library
Origins of Organic Chemistry • Organic literally means “derived from
living organisms” – organic chemistry was originally the study of
compounds extracted from living organisms and their natural products.
• It was believed that only living organisms possessed the “vital
force” necessary to create organic compounds (“vitalism”).

Chapter 1 Organic Compounds: Alkanes
