A niche is the range of physical and biological conditions in which a species lives and the way the species obtains what it needs to survive and reproduce.

Mutualism is the relationship between species in which both benefit. For example:
Prezi. The Science.

Resources and the Niche

The term resource can refer to any necessity of life, such as water, nutrients, light, food, or space. For plants, resources can include sunlight, water, and soil nutrients—all of which are essential to survival.
