The SB-900 is Nikon's biggest flash yet. It's not unmanageable, but it's bigger than the SB-400, SB-600 or SB-800. The SB-900 is a flash for full-time newsmen and wedding shooters. It's a poor choice for general photography, for which no flash at all is best, and your built-in flash is usually perfect for daytime fill.

Macro photography has been surging in popularity, especially online with social media and internet marketplaces. No matter what your area of interest is, you'll find techniques in this book to create strong macro images in it. Readers will learn how to creatively solve common, specific close-up and macro photography problems in a wide range of areas. But while lighting, lenses, equipment and techniques are discussed in detail for each image, so is the creative process. Why compose it in this way? Why is this angle better than another? Why would you want everything in focus for one photo, but only a small area for another? Readers will be given guidance so they can answer these questions for their own photography.
