In the middle of the nineteenth century, the Russian empire made a dramatic advance on the Pacific by annexing the vast regions of the Amur and Ussuri rivers. Although this remote realm was a virtual terra incognita for the Russian educated public, the acquisition of an 'Asian Mississippi' attracted great attention nonetheless, even stirring the dreams of Russia's most outstanding visionaries. Within a decade of its acquisition, however, the

dreams were gone and the Amur region largely abandoned and forgotten. In an innovative examination of Russia's perceptions of the new territories in the Far East, Mark Bassin sets the Amur enigma squarely in the context of the *Zeitgeist* in Russia at the time. *Imperial Visions* demonstrates the fundamental importance of geographical imagination in the mentalité of imperial Russia. This 1999 work offers a truly novel perspective on the complex and ambivalent ideological relationship between Russian nationalism, geographical identity and imperial expansion.

This is the second of a three-volume comprehensive reference work on *Gender across Languages*, which

provides systematic descriptions of various categories of gender (grammatical, lexical, referential, social) in 30 languages of diverse genetic, typological and socio-cultural backgrounds. Among the issues discussed for each language are the following: What are the structural properties of the language that have an impact on the relations between language and gender? What are the consequences for areas such as agreement, pronominalisation and word-formation? How is specification of and abstraction from (referential) gender achieved in a language? Is empirical evidence available for the assumption that masculine/male expressions are interpreted as generics? Can tendencies of variation and change be observed, and have alternatives been proposed for a more

equal linguistic treatment of women and men? This volume (and the previous two volumes) will provide the much-needed basis for explicitly comparative analyses of gender across languages. All chapters are original contributions and follow a common general outline developed by the editors. The book contains rich bibliographical and indexical material. Languages of Volume 2: Chinese, Dutch, Finnish, Hindi, Icelandic, Italian, Norwegian, Spanish, Vietnamese, Welsh.

This volume explores the potentially transformative role of effective laws and legal institutions in providing people with more opportunity that is both inclusive and equitable.

A Confederacy of Heretics examines the explosion of activity associated with the Architecture Gallery, the first gallery in Los Angeles dedicated exclusively to architecture. Instigated by Thom Mayne in the fall of 1979, the Architecture Gallery staged ten exhibitions in as many weeks by both young and established Los Angeles practitioners, featuring the work of Eugene Kupper, Roland Coate, Jr., Frederick Fisher, Frank Dimster, Frank Gehry, Peter de Bretteville, Morphosis (Thom Mayne and Michael Rotondi), Studio Works (Craig Hodgetts and Robert Mangurian), and Eric Owen Moss. Another young architect, Coy Howard, opened the events with a

lecture at the Southern California Institute of Architecture, which hosted talks by each exhibiting architect. In an unprecedented move by the popular press, the events were chronicled in weekly reviews by the critic John Dreyfuss in the Los Angeles Times. Gathering an array of original drawings, models, photographs, video recordings, and commentary alongside new assessments by current scholars, *A Confederacy of Heretics* aims neither to canonize the participating architects nor to consecrate their unorthodox activities. Rather, the book re-examines the early work of some of Los Angeles' most well-known architects, charts the development of their most potent design techniques, and documents a crucial turning point in Los Angeles architecture, a time when Angeleno architecture culture

shifted from working local variations on imported themes to exporting highly original disciplinary innovations with global reach. Taken together, the exhibition, symposium, and catalog that comprise *A Confederacy of Heretics* offer a unique lens through which to analyze a pivotal moment in the development of late twentieth-century architecture.
