Reviews the circumstances surrounding the Challenger accident to establish the probable cause or causes of the accident. Develops recommendations for corrective or other action based upon the Commission's findings and determinations. Color photos, charts and tables.

This publication covers PPPs with a focus on the implications for public finances in developing economies. Chapter 1 seeks to answer the question of whether PPPs are the "genie in the bottle" for governments seeking to plug the infrastructure gap: do they solve more problems than they create? This discussion lays the groundwork for further analysis. Chapter 2 explores the underlying reasons for the expansion of PPPs, the definitions and scope of PPPs in different contexts, and the historical trajectory of PPPs throughout the world, highlighting the common factors that have led to their current popularity. Chapter 3 details the multitude of institutional frameworks built to accommodate PPPs. It highlights the frameworks for national and subnational entities commissioning PPPs and deals with the involvement of state-owned enterprises. It also introduces fiscal frameworks for PPPs. Chapter 4 considers the fiscal and budgetary implications of PPPs from various perspectives. Chapter 5 covers the multiple forms of government financial support extended to PPPs and the practical implications of various countries' experiences with direct, indirect, explicit, and implicit forms of project support. Finally, Chapter 6 discusses unsolicited PPP proposals coming directly from private-sector firms that hope to service them. The publication concludes with a brief summation of the outlook for PPPs as well as concise policy recommendations.

It is well established that memory for emotional information is generally better than for neutral information. This Research Topic comprises a set of papers focusing on memory and its relation with motivational and emotional processes, ranging from electroencephalographic evidences of emotional modulation of memory systems, to the role of neurotransmitters/neuromodulators (i.e. endocannabinoid, glucocorticoid, serotonin, noradrenergic, dopaminergic systems), and second messengers on emotional memory, and the specific involvement of cerebral areas on the relation between memory and motivational/emotional processes (i.e. prefrontal cortex, amygdala, accumbens). In particular, some of the topics discussed in this Research Topic will include: cortical activity correlates of emotional modulation of memory systems, interactions between ascending vagal fibers and central noradrenergic systems in
