A companion to Bloomsbury's popular two-volume Greek to GCSE, this is the first course for Latin students that directly reflects the curriculum in a clear, concise and accessible way. Enhanced by colour artwork and text features, the books support the new OCR specification for Latin (first teaching 2016) as well as meeting the needs of later students, both at university and beyond. Written by two experienced school teachers, one also an examiner, the course is based on a keen understanding of what pupils find difficult, concentrating on the essentials and on the explanation of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote

learning is reduced. User-friendly, it also gives pupils a firm foundation for further study. Part 1 covers the basics and is self-contained, with its own reference section. It outlines the main declensions, a range of active tenses and a vocabulary of 275 Latin words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: the Fall of Troy, the journeys of Aeneas, the founding of Rome and the early kings, providing an excellent introduction to Roman culture alongside the language study.

Provides teachers and students alike with a modern, inviting and structured way to sustain interest and excellence in Latin. Based on the reading of original texts, the course is structured around a narrative detailing the life of the poet Horace, which helps students to develop an understanding of the times of Cicero and Augustus.

The first part of the book introduces new constructions and the translation of sentences from English to Latin, with reading passages at AS standard. The next sections provide translation and comprehension passages at AS and A-level, including verse unseens, scansion, and a list of 300 common poetic words. Next come longer unadapted extracts from a range of authors. Finally there is a reference section including a summary of all constructions, a comprehensive grammar, and a general vocabulary of about 1200 Latin words.

First written in response to a JACT survey of over 100 schools, and now endorsed by OCR, this textbook has become a standard resource for students in the UK and for readers across the world who are looking for a clear and thorough introduction to the language of the ancient Greeks. Revised throughout and enhanced by coloured artwork and text features, this edition will support the new OCR specification for Classical Greek (first teaching 2016). Part 1 covers the basics, whilst Part 2 introduces a wider range of grammatical forms and constructions, with a vocabulary of 435 words and reading material from Socrates and the Sophists to the world of myth, and finally to extended passages of lightly adapted Herodotus. Practice passages, exam papers and revision sentences for GCSE complete Part 2, which has a reference section covering the whole course. Written by a long-time school teacher and examiner, this two-part course is based on experience of what pupils find difficult, concentrating on the essentials and on the understanding of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. It aims to be user-friendly, but also to give pupils a firm foundation for further study.
