If your Expedition is too low to the ground to access your drain plug and oil filter, be sure to use jack stands and safe jacking procedures before getting under your Expedition. Most Fords have the oil type printed on the oil cap - it will likely be 5W-20, 5W-30, 5W-40, 10W-30 or 10W-40. If it isn't printed on the oil cap, check your owners manual for the exact type before adding new oil. We recommend wearing safety glasses whenever you are working under your Expedition. You never know what ...

Following the success of his first book, Drag Racing 101 , where IH Racing ' s Team Owner Ike Heckler Jr. explains how to build your first race car and secure sponsorship. Ike now brings you Drag Racing 201 - Racing in the New Economy. After racing at NHRA tracks in the northeast and southeast for the past 10 years in a booming economy where securing sponsorships was relatively easy, Ike takes you on an exciting journey through 2010 and explains what it is like to uproot your personal life in order to pursue the goal of semi-pro drag racing. With over 52 career round wins and national media exposure from SPEED TV ' s Pinks All Out, NHRA ' s National Dragster, and NMCA ' s Fastest Street Car magazine, Ike has secured corporate sponsorships from Lucas Oil, VP Racing Fuels, WIX Filters, O ' Reilly Auto Parts, ReMax Realty, Holiday Inn Hotels & Resorts, CARQUEST Auto Parts, and Ken ' s Speed & Machine. IH Racing ' s primary sponsor, Premier Properties of the Space Coast, is owned by Mr. Heckler and develops residential and commercial properties in southeast Florida. In Drag Racing 201 Ike explains how to use your own company together with your other sponsors to be able to fund a full race season and be able to travel the hundreds of miles from racetrack to racetrack economically. From getting into the Final 32 at the Pinks All Out event in West Palm, FL, to making the WIX All Out 16 at the Pinks All Out event at zMax Dragway in Charlotte, Ike brings you along to all the other races and other fun events he was able to attend in 2010 with the help of good friends and sponsors. You will also ride along as he moves from Florida to North Carolina, then back to Florida just so he could honor his commitment to all his sponsors and race the season. He will also show you how the degrading economy affected his racing operation in 2010 and how he had to adjust and sacrifice his personal life to be able to race and survive. Drag Racing 201 then looks into the future of the sport and projects how it may look a few years from now and gives the reader some valuable tips on how to afford racing a full season and how the racer may have to live differently in order to race and live their dream. Ike also gives the reader some valuable sponsorship tips along the way that will help with sponsor exposure and could make securing sponsorships a little easier. This 80 page full color book has over 75 pictures highlighting the West Palm FL, Charlotte NC, and the Bristol TN Pinks All Out events (and getting on SPEED TV), the Atlanta, NHRA Unleashed event, and what it feels like to work for an NHRA national event. If your goal is to drag race in the New Economy, this book is a must read that will save you money and increase your sponsor exposure !!

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Lists manufacturers' suggested retail and dealer invoice prices for all models, foreign and domestic, along with information on standard and optional equipment, specifications and reviews, and buying and leasing advice

CQ Weekly provides resources on non-partisan information on Capitol Hill. The Web version includes access to the full text of all articles published since 1983. In addition, some articles are available prior to when they appear in print.

Now in paperback, with a new foreword by Fred Krupp, an expert's illuminating preview of the cleaner, lighter, smarter cars of the future. In Driving the Future, Margo T. Oge portrays a future where clean, intelligent vehicles with lighter frames and alternative power trains will produce zero emissions and run at 100+ mpg. With electronic architectures more like those of airplanes, cars will be smarter and safer, will park themselves, and will network with other vehicles on the road to drive themselves. As the director of the EPA ' s Office of Transportation and Air Quality, Oge was the chief architect behind the Obama administration ' s landmark 2012 deal with automakers in the US market to double the fuel efficiency of their fleets and to cut greenhouse gas emissions in half by 2025. This was America ' s first formal climate action using regulation to reduce emissions through innovation in car design. Offering an insider account of the partnership between federal agencies, California, environmental groups, and car manufacturers that led to the historic deal, Margo discusses the science of climate change, the politics of addressing it, and the lessons learned for policy makers. She also takes the reader through the convergence of macro trends that will drive this innovation over the next forty years and be every bit as transformative as those wrought by Karl Benz and Henry Ford. Driving the Future is for anyone who wants to know what car they ' ll be driving in ten, twenty, or thirty years—and for everyone concerned about air quality and climate change now.
