The New Old World looks at the history of the European Union, the core continental countries within it, and the issue of its further expansion into Asia. It opens with a consideration of the origins and outcomes of European integration since

It then moves to more detailed accounts of political and cultural developments in the three principal states of the original Common Market—France, Germany and Italy. A third section explores the interrelated

Europe's fascination with America forms a contradictory pattern of hopes and fears, dreams and nightmares, yearnings and forebodings. America and Americans--according to one of their more
