Solomon Systech launches the world's first single-chip OLED lighting driver. Solomon Systech, a fabless display driver IC producer, announced their entry into the OLED lighting market with the SSD2355, which is the world's first single-chip OLED lighting driver. The SSD2355 can drive several OLED lighting panels simultaneously. The cost-effective (4 pcs of magnetic components only) driver supports multiple-phase buck driving, a dynamic output current of 5uA to 1.2A, a wide dimming depth of ...

OLED panels are current-controlled devices. Precious current driving circuits are necessary in OLED driver ICs. However, voltage driving circuits is equally important and should not be overlooked. Solomon Systech Limited, one of the world's premier OLED (Organic Light Emitting Diode) driver suppliers, leveraging its extensive experience and technical knowhow on display driver ICs, has developed OLED drivers exploiting the superior features of OLED displays - contrast, thinness, lightness ...
