IoT Basics: What is OPC UA? - SPOTLIGHTMETAL

A node is the basic unit of data in the OPC UA address space, which provides a standard way for OPC UA servers to represent objects to OPC UA clients. Nodes are pieces of information (for example, a unique temperature) and consist of attributes, the actual data value, and one or more references to other

Exploring OPC UA - OPC UA Certificate Basics. The use of certificates in cryptographic applications and online communication protocols is nothing new and can practically be traced all the way back to the 1970's when the "framework" for public key encryption (more on this in a future blog) came into being. With the (now-not-so-recent) Industry 4.0 movement coming out of Europe, and the design and operation changes brought about by the IIoT phenomenon, we are seeing more and more systems ...

A Beginner's Guide to OPC – OPC Connect

OPC is a published industrial standard for system interconnectivity. Its purpose is to provide a standards-based infrastructure for the exchange of process control data. It uses Microsoft's COM and DCOM technology to enable applications to exchange data on one or more computers using a client/server architecture.
