Oracle Web Cache • Oracle Web Cache is a secure reverse proxy cache and a compression engine deployed between • Browser and HTTP server • Browser and Content Management server to improve the performance of web sites by caching frequently accessed content • Oracle Web Cache supports

<Insert Picture Here> - Oracle
The Oracle Web Cache is one of the most important areas of Oracle9IAS tuning because of its important role in reducing cross-layer traffic. Because the Web Cache can keep HTML pages in RAM, the Oracle9IAS administrator can define sophisticated rules to govern the amount of RAM storage, the cachesability rules, and control Web Cache invalidations.
