As a security hardening guideline, use TDE at the level of tablespaces, which represents an optimal balance between performance and security. TDE encrypts sensitive table data stored in data files at the tablespace level. The following table lists the tablespaces and the types of objects in Oracle Fusion Applications.

Oracle Fusion Applications Security Hardening Guide

Oracle Fusion Applications enforces security in Oracle Fusion Applications Search and the Enterprise Crawl and Applications Search Framework (ECSF). Oracle Fusion Applications Search can be further hardened by enabling a secure sockets layer (SSL). Hardening Oracle Fusion Applications Search

Oracle Fusion Applications Security Hardening Guide

Oracle Fusion Applications presumes that security hardening decisions are based on analysis of risks and threats. The methodology for analyzing specific deployment requirements and guidelines to fulfill those requirements augments hardening practices that may be documented separately for Oracle Fusion Middleware and Oracle Database components included in an Oracle Fusion Applications deployment.

Oracle Fusion Applications Security Hardening Guide

Hardening Oracle Fusion Applications focuses on points of exposure to security risks on the boundaries and end points of a deployment. Security professionals such as Oracle Fusion Applications implementation consultants, security administrators, IT security managers, and IT auditors are involved in hardening Oracle Fusion Applications.
