Oracle TimesTen In-Memory Database (TimesTen) delivers real time application performance (low response time and high throughput) by changing the assumptions around where data resides at runtime. By managing data in memory, and optimizing data structures and access algorithms accordingly, database operations execute with maximum efficiency achieving dramatic gains in responsiveness and throughput.

Oracle TimesTen In-Memory Database
Oracle TimesTen In-Memory Database (TimesTen) is a full-featured, memory-optimized, relational database that provides very fast response time and high throughput to mission critical applications. TimesTen can be deployed as TimesTen Scaleout and TimesTen Classic.

TimesTen In-Memory Database Overview - Oracle
Welcome Oracle TimesTen In-Memory Database in classic mode or TimesTen Classic refers to a single-instance database as in... Oracle TimesTen In-Memory Database in grid mode or TimesTen Scaleout refers to a multiple-instance distributed database. TimesTen provides an Operator for Kubernetes, an ...

Oracle TimesTen In-Memory Database Documentation
Oracle TimesTen In-Memory Database is a memory-optimized relational database. Deployed in the application tier, TimesTen operates on databases that fit entirely in physical memory using standard SQL interfaces. High availability for the in-memory database is provided through real-time transactional replication.

Oracle TimesTen In-Memory Database
Oracle TimesTen In-Memory Database is a memory-optimized relational database. Deployed in the application tier, TimesTen operates on databases that fit entirely in physical memory using standard SQL interfaces. High availability for the in-memory database is provided through real-time transactional replication.

Oracle TimesTen In-Memory Database
Oracle TimesTen In-Memory Database (TimesTen) is a relational database that is memory-optimized for fast response and throughput. The database resides entirely in memory at runtime and is persisted to disk storage for the ability to recover and restart. Replication features allow high availability. TimesTen supports standard

Oracle® TimesTen In-Memory Database
Oracle TimesTen In-Memory Database is a memory-optimized relational database that empowers applications with the instant responsiveness and very high throughput required by today’s real-time enterprises and industries in communications, financial services, web applications, travel logistics, gaming, and more.

TimesTen In-Memory Database FAQ - Oracle
TimesTen is a relational database with objects like tables, indexes, sequences, views, materialized views and PLSQL packages and procedures. As TimesTen is an In-Memory Database, these objects are always in memory all of the time to enable extreme performance. These objects are also stored in the file system for persistence.

TimesTen Memory Management - Oracle Blogs
Since this blog is about the Oracle TimesTen In-Memory Database, let ’ s start by explaining what it is. The product documentation contains an introduction, and the Oracle Technology Network has several overview presentations that get into the

What is TimesTen? | Oracle TimesTen Talk Blog
Oracle TimesTen In-Memory Database 18c: Release 1 TimesTen Scaleout & TimesTen Classic/Cache 18.1.4.4.0 for Linux x86 (64-bit) (437,684,366 bytes) TimesTen Classic/Cache 18.1.4.1.0 for IBM AIX Power (64-bit) (379,885,258 bytes)

Oracle TimesTen Software Downloads
Oracle® TimesTen In-Memory Database Operations Guide 11g Release 2 (11.2.2) E21633-12 October 2014

Oracle® TimesTen In-Memory Database
The TimesTen In-Memory Database provides excellent performance on even commodity hardware. RDBMS performance has two important factors, latency and throughput. Latency is about how fast SQL Select, Insert, Update, Delete or Merge operations can be completed. TimesTen is known for enabling really low latency SQL transactions.

Just how fast is TimesTen In-Memory Database? - Oracle Blogs
Oracle TimesTen In-Memory Database (TimesTen) Release 18.1は、広く使われているTimesTen In-Memoryリレーショナル・データベースの次世代を象徴するものといえます。 .旧バージョンを土台として設計された TimesTen Scaleout を紹介します。 .透過的なデータ分散を持つ スケールアウト ・データベース、 単一のデータベース ・イメージ、 ACID トランザクション、 自動高可用性、 柔軟な ...

製品情報 - Oracle TimesTen In-Memory Database
TimesTen is an in-memory, relational database management system with persistence and recoverability. Originally designed and implemented at Hewlett-Packard labs in Palo Alto, California, TimesTen spun out into a separate startup in 1996 and was acquired by Oracle Corporation in 2005.

TimesTen - Wikipedia
Oracle Data Provider for .NET 11.1.0.7.110 is available for Oracle TimesTen In-Memory Database. It enables fast data access for .NET applications using ADO.NET. This data provider supports TimesTen release 11.2.1.6.1 or later on Microsoft Windows 32-bit and 64-bit platforms.

Oracle® TimesTen In-Memory Database
The Oracle TimesTen In-Memory Database provides real-time data management. It provides application-tier database and transaction management built on a memory-optimized architecture accessed through industry-standard interfaces.

Oracle TimesTen In-Memory Database Documentation
The TimesTen Quick Start applications can take up to 64 Mbytes of disk space. Depending on how your system is configured, you may not want to create the Quick Start DemoDataStore directory in the default location, /oradb/app/oratta/TimesTen/111122/info/DemoDataStore.

Step by Step Oracle TimesTen In-Memory Database ...
This document contains all necessary information for installing the Oracle TimesTen® In-Memory Database (TimesTen) Data Manager, Client and Server components. The TimesTen CD contains a README.TXTfile that holds the release notes. These notes list product information and late changes to the printed documentation.
