Provides a comprehensive source of information for the care of patients with musculoskeletal disorders. A reference textbook addressing physical, sociologic, cultural and psychological considerations as well as orthopedic nursing.

This comprehensive text provides the practicing nurse access to the physical, sociocultural, and physiological aspects of orthopedic nursing care and emphasizes up-to-date care for patients of all ages. The text takes a team approach to care for patients in various transitional healthcare settings. Pathophysiology and management modalities are covered in depth. Introductory chapters offer the fundamentals necessary to provide care to orthopedic patients with various diagnoses. The remainder of the book addresses orthopedic disorders categorized by physiologic processes. New evidence based content and outpatient care strategies have been added throughout the text and Internet resources are included at the end of every chapter. New chapters in the third edition explore genetics and wellness. Nationally respected editors and contributors lend their expertise to this book. Clinical pathways are included for major orthopedic conditions such as prehospital, hospital, and outpatient phases of care. A lifespan approach offers complete coverage of pediatric, adult, and elderly patients. Care of orthopedic patients is addressed across the continuum of care, with an emphasis on community-based care, rehabilitation, and management of patients with chronic conditions. A consistent format for orthopedic conditions in Part 2 outlines the definition, incidence, epidemiology, pathophysiology, assessment, diagnostic evaluation, and treatment. NIC Intervention and NOC Outcome classification language is used throughout. A separate chapter on Ergonomics (Chapter 3) focuses on this important topic. A new chapter on Wellness (Chapter 1) focuses on complementary/alternative therapies, and these therapies are also integrated into subsequent chapters. A new chapter on Genetics (Chapter 7) provides up-to-date coverage of this topic. An appendix has been added on Computers as a Resource for Education, designed for staff and patients. Questions and supporting references throughout examine treatment and care options, emphasizing evidence-based practice. Internet resources at the end of each chapter and in the appendix refer the reader to sites for further information. Innovations and future trends are highlighted in all chapters with a focus on outpatient care. The relative cost of treatment options is addressed.

This new edition of one of the premier references for geriatric nurses in hospital, long-term, and community settings delivers current guidelines, real-life case studies, and evidence-based protocols developed by master educators and practitioners. With a focus on improving quality of care, cost-effectiveness, and outcome, the fifth edition is updated to provide the most current information about care of common clinical conditions and issues in older patients. Several new expert contributors present current guidelines about hip fractures, frailty, perioperative and postoperative care, palliative care, and senior-friendly emergency departments. Additionally, chapters have been reorganized to enhance logical flow of content and easy information retrieval. Protocols, systematically tested by more than 300 participating NICHE (Nurses Improving Care for Health system Elders) hospitals, are organized in a consistent format and include an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, protocols are embedded within chapter text, providing the context and detailed evidence for each. Chapter objectives, annotated references, and evidence ratings for each protocol are provided along with resources for additional study. New to the Fifth Edition: Reorganized to enhance logical flow of information and ease of use Updated and revised Includes new contributions from expert educators and practitioners Provides new chapters on perioperative and postoperative care, general surgical care, care of hip fracture, palliative care, and the senior-friendly emergency department Key Features: Includes PowerPoints and a test bank for instructors Delivers evidence-based, current guidelines and protocols for care of common clinical conditions in the older person Illustrates the application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known geriatric leaders who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles

Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. AJN Book of the Year 2016 First-Place Winner in Gerontological Nursing! “The evidence-based protocols are designed as a primary reference and are useful, substantive, and timely....The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice.” —The Gerontologist “As a gerontological clinical educator/research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice.” Score: 97,\*\*\*\* —Doody’s The newest edition of this distinguished reference in geriatric nursing delivers updated guidelines, new illustrative case studies, and the latest evidence-based protocols developed by leading researchers, educators, and practitioners in each topic area. The sixth edition includes new approaches devoted to supporting LGBTQ+ elders, persons living with dementia and their families, and older adults living with HIV. New operational strategies provide guidance in using the electronic health record, implementing improved person-centered care approaches, and maintaining age-friendly atmospheres. Using evidence derived from all levels of care, this text offers developed guidelines for improving both quality and outcomes when caring for older adults in multiple disciplines, including interprofessional team members, long-term care and other staff educators, social workers, dietitians, and physicians. Chapters provide assessment and management principles, clinical interventions, specialty practice, and models of care. They consistently feature chapter objectives, annotated references, evidence ratings for each protocol, and resources for further investigation. Each protocol is embedded within the chapter content to provide context and detailed evidence. The protocols consistently include an overview, evidence-based assessment, intervention strategies, and a supporting case study with discussion. PowerPoint presentations and a test bank are available as instructor’s resources. New Chapters: Informational Technology: Embedding CPGs Organizational Approaches to Promote Person-Centered Care Environmental Approaches to Support Aging-Friendly Care HIV Prevention and Care for the Older Adult LGBTQ+ Perspectives Key Features: Best practices for in-patient, in-home, and long-term care settings Case studies with discussions in each chapter to illustrate application of clinical practice and related Nursing Standard of Practice Protocol The AGREE systematic method was used to evaluate each protocol and validate this book’s content Instructor’s resources including PowerPoints and a Test Bank Purchase includes digital access for use on most mobile devices and computers

As orthopaedic specialty units are being combined with other nursing units or integrated into medical-surgical units, more nurses are frequently unprepared to care for these patients with orthopaedic problems. To help them keep pace with the changing demands of this specialty, this book's straightforward approach and wealth of illustrations address the nursing care of patients with common orthopaedic conditions. Step-by-step coverage shows preoperative, postoperative, home, and rehabilitative care. Where appropriate, discussions also include the care of outpatients receiving follow-up or rehabilitative care. Special attention is given to the care of patients in traction or casts.
