Ottoman Rule in Damascus,
1708-1758. On the basis of new
evidence from the Ottoman archives
in Istanbul, Karl Barbir challenges the
current interpretation of Ottoman
rule in Damascus during the
eighteenth century. He argues that
the prevailing themes of decline and
stagnation--usually applied to the
entire century--in fact apply only to
the latter half of the century.

On the basis of new evidence from the Ottoman archives in Istanbul, Karl Barbir challenges the current interpretation of Ottoman rule in Damascus during the eighteenth century. He argues that the prevailing themes of decline and stagnation--usually applied to the entire century--in fact apply only to the latter half of the century. This discovery, he contends, affords a more balanced and realistic view of the Near East's Ottoman past than previous studies have suggested. Originally published in 1980. The Arab Lands under Ottoman Rule assesses the effects of Ottoman rule on the Arab Lands of Egypt, Greater Syria, Iraq, and Yemen between 1516 and 1800. Drawing attention to the important history of these regions, the book challenges outmoded perceptions of this period as a demoralizing prelude to the rise of Arab nationalism and Arab nation-states in the nineteenth and twentieth centuries. As well as exploring political events and developments, it delves into the extensive social, cultural, and economic changes that helped to shape the foundations of today's modern Middle and Near East. In doing so, it provides a detailed view of society, incorporating all socio-

This second edition has been significantly revised and updated and reflects the developments in research and scholarship since the publication of the first edition. Engaging with a wide range of primary sources and enhanced by a variety of maps and images to illustrate the text, *The Arab Lands under Ottoman Rule* is a unique and essential resource for students of early modern Ottoman history and the early modern Middle East.

1700-1750 concerning the longevity as well as the tenacity of the Ottoman Empire.

During the final decades of Ottoman rule, Palestine was administratively divided into two states, Jerusalem and Beirut. Both provinces exhibited a strikingly cohesive history of modernisation, and as the Ottoman Empire began to recede, the education systems, taxation and bureaucracy which were left behind formed the foundation of administration in the Palestinian authority today. The reign of Sultan Abdulmecid I saw great changes in Palestine, in line with the Tanzimat reform programme. These changes included the monetisation of the economy, structural changes in land ownership, legal reform, moves towards Ottoman centralisation and

the first European immigration to the area. Education was expanded to the lower classes, and Arab and Palestinian nationalism and Islamic movements began to stir by the end of the century as the first Zionist settlers arrived. At the heart of these radical shifts in thought and infrastructure were the new administrative centres established by the Ottomans during this period of re-organisation. Drawing extensively on official Ottoman records, Farid Al-Salim charts the transformation of one such centre, Tulkarm, from a small village in central Palestine to a seat of administrative reform in order to provide a new account of the forces behind the formation of modern Palestine.

In the Ottoman Empire for the four centuries that they were its subjects. The conventional wisdom was that the Arabs were a subject people who resented or, at best, were indifferent to their Ottoman overlords. This book argues that two social classes - Sunni religious scholars and urban notables - were willing collaborators in the imperial enterprise, and without whose support the Ottoman Empire would not have ruled the Arab lands for as long as they did.

A theoretically informed account of how the Ottoman state redefined itself during the last decades of empire.

Shiites as a constituent of Lebanese society. Winter presents a history of the community before the 19th century, based primarily on Ottoman Turkish documents. From these, he examines how local Shiites were well integrated in the Ottoman system of rule, and that Lebanon as an autonomous entity only developed in the course of the 18th century through the marginalization and then violent elimination of the indigenous Shiite leaderships by an increasingly powerful Druze-Maronite emirate. As such the book recovers the Ottoman-era history of a group which has always been neglected in chronicle-based works, and in doing so, fundamentally calls into question the historic place within 'Lebanon' of what has today become the country's largest and most activist sectarian
