The best paper mills have a whole host of ways to reduce their environmental impacts with these activities. It takes 100 liters of water to produce 1 kilogram of paper. However, sustainable paper mills have sophisticated wastewater treatment plants allowing for up to 90% of the water used to be recycled. Chlorine in the Paper Making Process

Paper and The Environment • Print Shoppe

The environmental impact of paper is significant, which has led to changes in industry and behaviour at both business and personal levels. With the use of modern technology such as the printing press and the highly mechanized harvesting of wood, disposable paper became a relatively cheap commodity, which led to a high level of consumption and waste. The rise in global environmental issues such as air and water pollution, climate change, overflowing landfills and clearcutting have all led to inc
