Vietnam has actively organized the National Competition in Mathematics and since 1962, the Vietnamese Mathematical Olympiad (VMO). On the global stage, Vietnam has also competed in the International Mathematical Olympiad (IMO) since 1974 and constantly emerged as one of the top ten.To inspire and further challenge readers, we have gathered in this book problems of various degrees of difficulty of the VMO from 1962 to 2009.The book is highly useful for high school students and teachers, coaches and instructors preparing for mathematical olympiads, as well as non-experts simply interested in having the edge over their opponents in mathematical competitions.

This book is the first in the series of the yearbooks of the Association of Mathematics Educators in Singapore. It is highly unique as it addresses a focused theme of mathematics education. The chapters of the book illustrate the immense diversity within the theme and presents research that translates into classroom pedagogies.The chapters of the book illustrate how mathematical problems may be crafted and infused in classroom teaching. Several novel pedagogies, such as learning mathematics through productive failure, problem posing and generative activities are presented in the book. The chapters are comprehensive and laden with evidence-based examples for both mathematics educators and classroom teachers of mathematics. The book is an invaluable contribution towards the already established field of research of mathematical problem solving. It is also a must read for graduate research students and mathematics educators.

This report aims to identify and analyze specific Nordic reading results and trends from 2000 to 2009. There is focus on weak readers and gender issues, and there are results from an analysis of two Danish national options; one covers tests of basic reading skills, word decoding and vocabulary knowledge, while the other presents results from analysis of oversampling of students with immigrant background. The publication also gives an overview of the school systems in the Nordic countries with a timeline of politically induced changes from 1990 to 2010 – the years of the PISA assessments. An overview of such changes has never previously been provided. The documented changes are used to form possible explanations for trends in PISA reading results in the respective countries.

The 'ECIS International Schools Directory 2009/10' contains up-to-date facts on more than 800 schools worldwide and comprehensive details of over 570 of them which are ECIS members.

This book discusses reforms that should be undertaken in secondary education to support Ethiopia's transition from a low- to middle-income economy. The most critical reform identified is the introduction of a flexible curriculum that serves the needs of all students, including those who may not pursue higher education.
