practical answers to questions raised during PAT testing. It is much easier to understand than the IEE Code of Practice (COP). It strikes a balance between giving enough technical background and easy to

follow practical advice in implementing a PAT testing scheme. Someone wanting to undertake PAT testing using a PASS/FAIL PAT Tester need only read through the Overview, Planning and Doing the Work sections to get

started. If they come across any appliances that they are not quite sure how to test, then a quick look within the Test Examples section should provide an answer. For those wanting more technical information on how the tests

are done and how to interpret the test results, the PAT Testing: Technical Information section should provide all the answers they are looking for. This section contains many practical tips and hints

regarding PAT Testing of a variety of appliances that are found in offices, homes, schools and factories. Many of these are based around questions either from delegates or calls to our technical support line.

intends to test in-house as well as the more experienced practitioner who plans to provide a PAT Testing service to other companies.
