Used alongside the students' text, Higher National Engineering 2nd edition, this pack offers a complete suite of lecturer resource material and photocopiable handouts for the compulsory core units of the 2003 BTEC Higher Nationals in Engineering. Full coverage is given of the common core units for HNC/D (units 1 - 3) for all pathways, as well as the two different Engineering Principles units (unit 5) for mechanical and electrical/electronic engineering, and the additional unit required at HND for these pathways (Engineering Design - unit 6). The authors provide all the resources needed by a busy lecturer, as well as a bank of student-centred practical work and revision material, which will enable students to gain the skills, knowledge and understanding they require. This pack will save a course team many hours' work preparing handouts and assignments, and is freely photocopiable within the purchasing institution. The pack includes: * Exercises to support and develop work in the accompanying student text * Planned projects which will enable students to display a wide range of skills and use their own initiative * Reference material for use as hand-outs * Background on running the new HNC/HND courses * Tutor's notes supporting activities in the students' book and resource pack

Learners with a VET background experience much higher rates of attrition compared to learners entering HE with academic qualifications. Degrees of Success explores the transition from vocational to higher education, and outlines what more can be done to support and provide improved access to HE for these learners.

Read Book Pearson Btec Level 5 Higher Nationals In Advanced Practice

The aim of this book is to provide comprehensive coverage of topics in Unit 1 of the BTEC Level 3 course in Information Technology in an interesting and approachable manner. If you are studying this course, you need to notice, read about, experience and analyse the impact and implications of current and emerging digital technologies. Examples and case studies from scenarios and events that have recently been in the news are used to bring the subject to life. Reading and discussing articles from quality newspapers, whether printed or online, discussing relevant TV documentaries, noticing and analysing the use of digital technology in countless aspects of life, as well as learning from a textbook, are all going to contribute to a successful exam result. The book is divided into six sections corresponding to the six Learning Aims outlined in the specification, complementing each of the PG Online teaching resource packs. These sections are divided into between four and eight chapters, each containing material that can be covered in one or two lessons. The chapters have in-text questions which can be used as discussion points in a lesson. An extra chapter at the end of Learning Aim B on "Drawing System Diagrams" will be useful for students faced with a question on the exam for which they are required to draw such a diagram. In addition to almost 100 in-text questions and discussion points, there are over 80 end-of-chapter exercises that are designed to give practice in answering exam-style questions, using command words such as state, describe, explain, analyse. As much practice as possible is needed in answering such questions and getting feedback from the teacher so as to understand how to gain the maximum possible marks in the final exam.

In a changing world, what is the social purpose of higher education? Combining a critique of contemporary universities, a manifesto for the future and a provocation to stimulate change, *The New Power University* examines how higher education can flourish in the 21st century. Using the framing of 'new power', Jonathan Grant illustrates how a different purpose for universities is necessary, through the application of a new set of values that puts social responsibility at the core of the academic mission, allowing the university to become an advocate of the policy and political issues that matter to its communities. *The New Power University* offers both a warning against the complacency of old power and a voice for many who see the opportunity and necessity for radical change in higher education. 'Jonathan Grant examines the trends and urges the shedding of old shibboleths in order to embrace a new future. Insightful and engaging, this book will spur and shape the urgent debates learning communities need to have and resolve to avoid being left behind.' Julia Gillard, Former Australian Prime Minister and Minister for Education 'A must-read for anyone interested in the transformative power of higher education.' Ed Byrne, Former President King's College London; co-author of *The University Challenge* 'The New Power University is essential material for anyone wondering what universities are for and how they can help provide the answers to the most pressing challenges of our times.' Jo Johnson, Chairman of Tes Global; former UK Minister for Universities, Science and Innovation

Read Book Pearson Btec Level 5 Higher Nationals In Advanced Practice

From genetics to functional anatomy, cell biology to the equine digestive system, Equine Science, Third Edition covers all the essential scientific knowledge you need for your equine programme.
