A physician having completed training in this field is referred to as a physiatrist.

### *About Physical Medicine & Rehabilitation*

Physical rehabilitation for long-term care residents may be effective, reducing disability with few adverse events, but effects appear quite small and may not be applicable to all residents. There is insufficient evidence to reach conclusions about improvement sustainability, cost-effectiveness, or which interventions are most appropriate.

### *Physical rehabilitation for older people in long-term care ...*

In addition to the question of whether physical rehabilitation in general is beneficial, it is still unclear which specific rehabilitation approaches are effective, and the most appropriate frequency and intensity with which to apply them in practice (Connolly 2012). There is currently no Cochrane systematic review in this area.
