Welcome to Picprojects. The PIC Projects website features projects created since 2004 along with snippets and other information. Everything here uses parts from Microchip's 8-bit mid-range PIC microcontrollers. Earlier work was based on the original 12F and 16F ranges such as the 16F628A and 12F629 and code written in assembler. More recently the enhanced mid-range devices such as 12F1822, 16F1825 have been favorites and currently the latest devices with Core Independent Peripherals (CIPs)
