How is academia portrayed in children's literature? This Element ambitiously surveys fictional professors in texts marketed towards children, who are overwhelmingly white and male, tending to be elderly scientists. Professors fall into three stereotypes: the vehicle to explain scientific facts, the baffled genius, and the evil madman. By the late twentieth century, the stereotype of the male, mad, muddlehead, called Professor SomethingDumb, is formed in humorous yet pejorative fashion. This Element provides a publishing history of the role of academics in children's literature, questioning the book culture which promotes the enforcement of stereotypes regarding intellectual expertise in children's media. This title is also available, with additional material, as Open Access.

Fourteen shark species, from the utterly terrifying to the surprisingly docile, glide through the pages of this vibrantly illustrated, poetic picture book. From the enormous whale shark to the legendary great white to the enigmatic goblin shark to the small cookie-cutter shark, Slickety Quick is a delightful frenzy of shark mayhem. Mysterious species such as the camouflaged wobbegong and the elusive frilled shark share the waters with better-known blue and nurse sharks, each commemorated in a poem by Skila Brown and illustrated by Bob Kolar. Sneaky shark facts ripple through each spread to further inform the brave and curious young reader intrigued by the power -- and danger -- of these amazing creatures.

From the beginning of plantation days, Hawaii has been home to many different cultures and ethnicities. Everyone learned how to get along by sharing their food, their traditions, their celebrations, and their languages. Even today, throughout the islands, many different languages can be heard in the market, on the beach, and on the playground. One to Ten in Hawaii introduces kids to nine different languages by teaching them how to count from one to ten in English, Hawaiian, Japanese, Chinese (Mandarin), Korean, Tagalog, Samoan, Vietnamese, and Spanish. There's no better time to feed your child's curiosity about language, math, cultures, and the natural world around them. Kristi has also illustrated The Twelve Days of Hula.

From A to Z, in full-color photographs, children are seen acting out verbs for every letter of the alphabet, including arching, blowing, climbing, and diving.

a closely observed and completely absorbing story of how studio politics and misguided commercialism turn a promising movie into an all-around disaster. The charismatic and hard-bitten director and actor John Huston is at the center of the book, determined to make Stephen Crane's *The Red Badge of Courage*--one of the great and defining works of American literature, the first modern war novel, a book whose vivid imagistic style invites the description of cinematic--into a movie that is worthy of it. At first all goes well, as Huston shoots and puts together a two-hour film that is, he feels, the best he's ever made. Then the studio bosses step in and the audience previews begin, conferences are held, and the movie is taken out of Huston's hands, cut down by a third, and finally released--with results that please no one and certainly not the public: It was an expensive flop. In *Picture*, which Charlie Chaplin aptly described as "brilliant and sagacious," Ross is a gadfly on the wall taking note of the operations of a system designed to crank out mediocrity.
