The third edition of this internationally renowned and respected text is an ideal introduction to the subject of international finance. Theory is clearly explained and constantly related to the the realities of the modern world economy. The reader is taken through the theories and differing policies of the balance of payments, exchange rates and the international monetary system. Extensive use is made of figures, tables and graphs to illustrate the arguments in the text. It is thoroughly updated and includes a new chapter on the Asian financial crisis. Companion Website: http://www.palgrave.com/business/pilbeam_int/home.htm

This popular textbook offers a broad and accessible introduction to the building blocks of modern finance: financial markets, institutions and instruments. Focussing on the core elements of the subject, the author blends theory with real-life data, cases and numerical worked examples, linking the material to practice at just the right level of technical complexity. This new edition has updated data and cases throughout, ensuring that it is as up-to-date as possible in this fast-moving area. More assessment and self-test resources have been added to the book to help support students and lecturers. It is ideally suited to students at all levels who take economics, business and finance courses, as well as for those who want to understand the workings of the modern financial world. New to this Edition: - New case studies, including coverage of the Libor and foreign exchange rigging scandals, Bitcoin, the FinTech revolution and issues raised by Brexit - Fully updated data and relevant numerical examples - Coverage of derivatives such as futures, options and swaps - Extensive discussion of regulatory developments since the financial crisis - A companion website featuring teaching resources is available

This book is the CORE TEXT for Quantitative Methods for Business Management Course Convenors: Lee Fawcett and Daniel Henderson

This new textbook provides students with a comprehensive and accessible introduction to the subject of security studies, with a strong emphasis on the use of case studies. In addition to presenting the major theoretical perspectives, the book examines a range of important and controversial topics in modern debates, covering both traditional military and non-military security issues, such as proliferation, humanitarian intervention, food security and environmental security. Unlike most standard textbooks, the volume also offers a wide range of case studies - including chapters on the USA, China, the Middle East, Russia, Africa, the Arctic, the Middle East, Europe and Latin America - providing detailed analyses of important global security issues. The 34 chapters contain pedagogical features such as textboxes, summary points and recommended further reading and are divided into five thematic sections: Conceptual and Theoretical Military Security Non-Military Security Institutions and Security Case Studies This textbook will be essential reading for all students of security studies and highly recommended for students of critical security studies, human security, peace and conflict studies, foreign policy and International Relations in general.

Cross-border transactions involve a variety of financial operations, including arbitrage, hedging, speculation, financing and investment. These inter-related operations give rise to foreign exchange exposure and affect the overall financial performance of multinational firms. The book aims to provide an integrated treatment of multinational financial operations, whilst taking into account some real world complexities such as bid/offer spreads, transaction costs, capital rationing, and market imperfections.

Examines financial crises of the past and discusses similarities between these events and the current crisis, presenting and comparing historical patterns in bank failures, inflation, debt, currency, housing, employment, and government spending.
