Written around 380 BC, The Republic work is an important contribution to the age old question of how to best structure a society in a just way. Presented in the form of a dialogue between Socrates and three different interlocutors, it is an enquiry into the notion of a perfect community and the ideal individual within it. It is considered Plato's best-known work and has proven to be one of the most intellectually and historically influential works of philosophy and political theory. One of the most important books ever written on the subject of philosophy and political theory. An essential read for any student of philosophy or political science.

A well-trained theologian, a gifted and dedicated teacher of economics for over forty years, and the author of a highly regarded and widely used textbook, "The Economic Way of Thinking", Paul Heyne influenced generations of students of economics. Many of the essays in this volume are published here for the first time. The editors, Geoffrey Brennan and A M C Waterman, have divided Heyne's essays thematically to cover three general areas: the ethical foundations of free markets, the connection between those ethical foundations and Christian thought, and the teaching of economics -- both method and substance. Heyne's writings are unique in that he takes the critics of the free market order seriously and addresses their arguments directly, showing how they are defective in their understanding of economics and in their ethical and theological underpinnings. The engaging style of Heyne's essays makes them accessible to students as well as to scholars. Even in discussions of topics well beyond the fundamental level, Heyne still succeeds in providing students with an appreciation of basic economic principles.
