A bold study that reveals Dante's medieval vision of Scripture as theophany through pioneering use of contemporary theory and phenomenology.

Monasticism, in all of its variations, was a feature of almost every landscape in the medieval West. So ubiquitous were religious women and men throughout the Middle Ages that all medievalists encounter monasticism in their intellectual worlds. While there is enormous interest in medieval monasticism among Anglophone scholars, language is often a barrier to accessing some of the most important and groundbreaking research emerging from Europe. The Cambridge History of Medieval Monasticism in the Latin West offers a comprehensive treatment of medieval monasticism, from Late Antiquity to the end of the Middle Ages. The essays, specially commissioned for this volume and written by an international team of scholars, with contributors from Australia, Belgium, Canada, England, France, Germany, Italy, the Netherlands, Spain, Switzerland, and the United States, cover a range of topics and themes and represent the most up-to-date discoveries on this topic.

Originally published in 1972, Themes and Images in the Medieval English Religious Lyric discusses themes and images in religious lyric poetry in Medieval English poetry. The book looks at the affect that tradition and convention had on the religious poetry of the medieval period. It examines the background of the lyrics, including the Latin tradition which was inherited by medieval vernacular and shows how religious lyric poetry presents, through a rich variety of images, the significant incidents in the scheme of Christ's redemption, such as the Annunciation, the Nativity, the Passion and the Resurrection. It also considers the lyrics which were designed to assist humanity in the task of living in a Christian life, as well as those which prepared them for death.

I Swear I Saw This records visionary anthropologist Michael Taussig's reflections on the fieldwork notebooks he kept through forty years of travels in Colombia. Taking as a starting point a drawing he made in Medellin in 2006—as well as its caption, "I swear I saw this"—Taussig considers the fieldwork notebook as a type of modernist literature and the place where writers and other creators first work out the imaginative logic of discovery. Notebooks mix the raw material of observation with reverie, juxtaposed, in Taussig's case, with drawings, watercolors, and newspaper cuttings, which blend the inner and outer worlds in a fashion reminiscent of Brion Gysin and William Burroughs's surreal cut-up technique. Focusing on the small details and observations that are lost when writers convert their notes into finished pieces, Taussig calls for new ways of seeing and using the notebook as form. Memory emerges as a central motif in I Swear I Saw This as he explores his penchant to inscribe new recollections in the margins or directly over the original entries days or weeks after an event. This palimpsest of afterthoughts leads to ruminations on Freud's analysis of dreams, Proust's thoughts on the involuntary workings of memory, and Benjamin's theories of history—fieldwork, Taussig writes, provokes childhood memories with startling ease. I Swear I Saw This exhibits Taussig's characteristic verve and intellectual audacity, here combined with a revelatory sense of intimacy. He writes, "drawing is thus a depicting, a hauling, an unraveling, and being impelled toward something or somebody." Readers will exult in joining Taussig once again as he follows the threads of a tangled skein of inspired associations.

Simone Verovio was the first printer to produce a substantial number of musical prints using engraved copper plates. This intaglio printing techniquenot only allowed him to print on demand, but also to combine different kinds of notation on one page opening: voice parts with corresponding harpsichord and lute intabulations.This detailed comparison of intaglio and relief printing techniques in the editions associated with Verovio sheds light on the production of sheet music around 1600 and the comparison of the vocal and instrumental parts provides ground-breaking insights into historical performance practice. Published in the year 1981, Reflections of Women in Antiquity is a valuable contribution to the field of Performance.

"The great future ambitions of Acqui, a European spa city, are rooted in its history, of which this book tells the story. As in other localities that were made famous (and attractive) by their thermal waters, it is the spa that has given rise to its economic well-being and, especially, to its historical identity and memory. Centuries of use of its curative mud and waters brought with it great buildings for accommodation and treatment, though the city truly took off in the late nineteenth and early twentieth century. However, unlike many international centres of relaxation and recreation, Acqui has always been a place more for treatment than for leisure. Though never built, the architectural designs of the 1920s were extraordinary in terms of their spatial and design solutions, and still today they point to an age of enormous ambition, accompanied by a grand vision for the city and its spa system. A vision in which the city believes as much today as ever before."--Publisher.
