With a consultative framework, this text presents illustrative case studies to increase the practitioners knowledge about managing complex breastfeeding cases.Case Studies in Breastfeeding: Problem Solving Skills and Strategies combines logic, wisdom, and theory in order to convey a deeper understanding of how to act in accordance with the highest needs of the breastfeeding mother and baby. In this book, authors Karin Cadwell, PhD, RN, IBCLC and Cindy Turner-Maffei, MA, IBCLC develop a consultative framework and present illustrative case studies designed to increase the practitioner's knowledge about managing complex breastfeeding cases. It includes tables and charts as well as color prints.

The Pocket Guide for Lactation Management is perfect for planning and reference in the variety of situations commonly encountered by those working with lactating and breastfeeding mothers and their babies. Organized by situation for quick reference, this pocket guide also includes charts, algorithms, and diagrams.

Maternal and Infant Assessment for Breastfeeding and Human Lactation: A Guide for the Practitioner, Second Edition explores the characteristics of breastfeeding problems that can be seen, heard, or observed, and allows the assessor to distinguish between breastfeeding problems and actual medical issues. This text is designed for healthcare professionals who are responsible for developing a process for determining the breastfeeding status of mothers and infants. While past experience can provide some direction for exploration, a thorough assessment demands detailed examination of the unique aspects of the new situation. Assessors must individually tailor their approach depending on the circumstances; this text offers appropriate solutions to various potential issues. The second edition of Maternal and Infant Assessment for Breastfeeding and Human Lactation includes extensive new colored pictures and diagrams, as well as additional key information on the challenges of breastfeeding a premature infant.

Written from a teaching perspective, Counseling the Nursing Mother: A Lactation Consultant & e(tm)s Guide, Sixth Edition presents topics within a counseling framework with practical suggestions and evidence-based information interwoven throughout. Completely updated and revised, it includes new research on milk composition, the importance of the gut microbiome and skin-to-skin care, Affordable Care Act changes, and the latest guidelines from the World Health Organization for breastfeeding with HIV. Also explored and expanded are discussions on cultural competence, working effectively and sensitively with LGBTQ families, addressing disparities in health equity, milk banking issues, and social media trends for lactation information and support. Additionally, the Sixth Edition also serves as a significant teaching tool for students, interns, and other healthcare professionals. With an extensive glossary and bulleted lists at the end of each chapter, it is an ideal study guide for International Board Certified Lactation Consultant (IBCLC) certification and practice. Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook.

Evidence-based guide that provides relevant information on breastfeeding and lactation blended with clinical suggestions for best outcomes. This includes reviews of literature, and covers the incidence, etiology, risk factors, prevention, prognosis and implications, interventions, expected outcomes, care plans, clinical algorithms, and more, providing clinicians a research-based approach to breastfeeding care.
