Pranayama plays a role in ridding your bodies of harmful toxins when you breathe out. Breathing supplies our lungs and blood with fresh oxygen, boost our immune system, calm down the mind, and improving our memory, virility and strengthens our neurological system.

Pranayama: The Vedic Science of Breath: 14 Ultimate ...

Pranayama is the practice of breath control in yoga. In modern yoga as exercise, it consists of synchronising the breath with movements between asanas, but is also a distinct breathing exercise on its own, usually practised after asanas. In texts like the Bhagavad Gita and the Yoga Sutras of Patanjali, and later in Hatha yoga texts, it meant the complete suspension of breathing.

Pranayama is the yogic science of breath control. Yoga teaches that breathing can be regulated and controlled for various health and spiritual benefits. Man inhales and exhales from the time he is born till his death. Breathing provides the vital energy required for sustenance of the body.

Pranayama - The Art and Science of Breath Control in Yoga

The first four rungs are yama (restraints), niyama (observances), asana (posture), and pranayama (breath control). The four higher rungs are pratyahara (sense withdrawal), dharana (concentration), dhyana (meditation), and samadhi (the superconscious state; the ultimate freedom from the cycle of birth and death).

Pranayama: From Breath to Cosmic Energy | Himalayan Institute

Pranayama is the control of the Prana and the vital forces of the body. It is regulation of the breath. This is the most important step. The aim of Pranayama is the control of Prana. Pranayama begins with the regulation of the breath for having control over the life-currents or inner vital force.

The Science of Pranayama - Divine Life Society

So pranayama is typically defined as a set of practices used to control prana in the body by means of your breathing patterns, such as to hold your breath or to practice deep breathing. Pranayama techniques date back to the origins of yoga that were introduced in ancient texts. This is said to be around 6th and 5th centuries BC.
