We form art. Art forms us. The title of this book has a dual meaning. As humans form works of art, we are in turn formed by what we create. The art world
 constantly evolves, as today's artists interpret, challenge, and ultimately create the world around them. The 11th edition of Prebles' Artforms reflects this
 dynamic environment; it is one of the most exhaustive revisions in the book's history. Three recent trends drive this edition: changing pedagogical needs,
 new scholarly research, and recent creativity by artists around the world. MyArtsLab is an integral part of the Prebles' Artforms program. Engaging
 activities and assessment provide a teaching and learning system that helps students experience and interact with art. Key learning tools include ART 21
 videos, Studio Technique videos, and our hallmark Closer Look tours of works of art. Teaching and Learning Experience This program will provide a better
 teaching and learning experience-for you and your students. It: Personalizes Learning with MyArtsLab: The new MyArtsLab delivers proven results in
 helping students succeed, and provides engaging experiences that personalize learning. Provides Thematic Exploration: Help students explore the reasons
 for creating art, the motivation for individual artists, and how art impacts its audience. Emphasizes Critical Thinking: Chapter opening-Thinking Ahead
 questions encourage students to focus and think critically about the issues to come. Focuses on Art Today: More than 175 new images reflect the author's
 view that contemporary art provides the best path to art appreciation because of its currency and global nature. Note: You are purchasing a standalone
 product; MyArtsLab does not come packaged with this content. If you would like to purchase both the physical text and MyArtsLab search for ISBN-10:

Text and accompanying photographs present art theory, practices, and history from ancient Egypt through the early twenty-first century.

More than 115 entries clearly explain the who, what, when, and where of art since 1945. Some entries deal with concepts, such as formalism, multiculturalism, and the picture plane; some discuss specific movements, such as Abstract Expressionism and Fluxus; some describe various ways of making art, such as collage, performance, and video. Together they provide an invaluable key to the specialized, often baffling vocabulary so often used in today's art world. Complementing the entries are two additional noteworthy features. The first, a one-page ArtChart, presents the movements of the postwar years in a concise format that makes their chronological connections immediately visible. The second is a twenty-eight-page timeline - illustrated with full-color reproductions of paintings, sculptures, and installations - that chronicles events in the art world and the world at large, providing a context for the entries that follow, in addition, for this updated and revised edition, birth and death dates for the artists have been added to the index, along with their nationalities, making this easy-to-use reference even more informative.

Young Jose Francisco grows up in Texas, determined to write about the border world - the immigrants and illegals, Mexican poverty and Yankee prosperity - stories to break the stand-off silence with a victory shout, to shatter at last the crystal frontier.

This edition addresses such fundamental matters as: description versus analysis; critical approaches to art (e.g., formal analysis; cultural materialism; gender studies); getting ideas for an essay; developing paragraphs; organizing a comparison; using bibliographic tools, including the internet; writing a catalog entry; quoting sources; documenting sources, using either the Art Bulletin style or the Chicago Manual style; avoiding sexist and Eurocentric language; writing citations for illustrations; engaging in peer review; editing the final draft; writing essay examinations.

"The Humanities through the Arts, tenth edition, explores the humanities with an emphasis on the arts. Examining the relationship of the humanities to values, objects, and events important to people is central to this book. We make a distinction between artists and other humanists: Artists reveal values, while other humanists examine or reflect on values. We study how values are revealed in the arts while keeping in mind a basic question: "What is art?" Judging by the existence of ancient artifacts, we see that artistic expression is one of the most fundamental human activities. It binds us together as a people by revealing the most important values of our culture"--

Packed with current examples you can easily relate to, Tischler's INTRODUCTION TO SOCIOLOGY, 11E delivers comprehensive, up-to-date coverage in a succinct and affordable format. The author begins by equipping you with tools for success, including tips for how to read, study, and take tests more effectively. A built-in study guide and practice tests ensure thorough understanding. The text threads two basic ideas throughout: sociology is a rigorous, scientific discipline, and basic knowledge of sociology is essential for understanding social interaction in many work and social settings. With its streamlined 16 chapters, INTRODUCTION TO SOCIOLOGY, 11E delivers cutting-edge coverage that is concise yet thorough--and makes sociology completely accessible. Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads them to think critically about the world in which they live - a world saturated with images of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms. The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites, chat rooms, and instant messages.
