Most sections should have a range of difficulty levels in the problems although this will vary from section to section.

Calculus I (Practice Problems)

In each of these cases, calculus is needed to solve the problem. Although precalculus mathematics (geometry, algebra, and trigonometry) also deals with velocities, accelerations, tangent lines, slopes, and so on, there is a fundamental difference between precalculus mathematics and calculus.

Understanding Calculus: Problems, Solutions, and Tips

story problems force you to connect many steps in the solution process. You are no longer given a list of formulas to work using memorized steps. So, in the end, the story problem is a multi-step process such that the "A-Ha!" comes only after lots of intense effort. All of this means you have to spend time working on story problems.
