The methods of soil preparation include: 1. Ploughing. It is also known as tilling. It is the process of loosening and turning the soil either manually or by the tractors. Organic manures and phosphates are mixed with the soil at this stage. This increases the fertility of the soil before the seeds are sown. 2.

e-books - Graham Centre

Principles of Field Crop Production is a guide to commercial crop production as it is practised in Australia. In addition to chapters on cultural practices, irrigation, climate and crop distribution, crop improvement and soils, the book also examines non-agronomic aspects, such as society, politics, and farm management, which are often overlooked in a textbook of this nature.
