This book outlines the principles behind the international law of foreign investment. The main focus is on the law governed by bilateral and multilateral investment treaties. The book traces the purpose, context and evolution of the clauses and provisions characteristic of contemporary investment treaties, and analyses the case law interpreting the issues raised by standard clauses.

This book provides an ideal introduction to the fundamentals of international investment law and dispute settlement for students or practitioners. It combines a systematic analytical study of the texts and principles underlying investment law with a jurisprudential analysis of the case law arising in international tribunals.

Drawing on State practice, arbitral awards and national decisions, this book provides a systematic study of the sources of rights and obligations in the field of transnational investment, and their coordination and interaction.

This comprehensive book provides a complete overview of the international legal system of foreign investment protection, synthesising material from treaties, general international law, contracts and case law to demonstrate a coherent system of investment protection. Through this systematic approach, the book considers all aspects of the discipline, providing a thorough and accessible analysis.

"...This book [...] goes beyond stating what the law is and focuses on controversies occurring within this area of the law... an excellent introduction to this complex area of international law for newcomers to the subject" Kate Miles, Australian International Law Journal The updated edition of this acclaimed book offers a critical overview of the law of foreign investment, incorporating a thorough analysis of the principles and standards of treatment available to foreign investors in international law. It is authoritative and multi-layered, offering an analysis of the key issues and an insightful assessment of recent trends in the case law, from both developed and developing country perspectives. A major feature of the book is that it deals with the tension between the law of foreign investment and other competing principles of international law. In doing so, it proposes ways of achieving a balance between these principles and the need to protect the legitimate rights and expectations of foreign investors on the one hand, and the need not to restrict unduly the right of host governments to implement their public policy on the other, including the protection of the environment and human rights, and the promotion of social and economic justice within the host country. Many of the pioneering ideas that were advanced in the first edition of this book in 2008 have been taken up by governments and international organisations in their attempts to reform the investor-State dispute settlement mechanism and strike a balance between different competing principles in developing international investment law. Accordingly, this fourth edition captures the essence of the ongoing multiple reform processes -either planned or envisaged - currently underway.

In General Principles of Law in Investment Arbitration, the authors address selected general principles of law, assessing their functions in investment arbitration. The resulting picture is that of a lively source that escapes doctrinal straitjackets and maintains its relevance.

This essential book discusses a wide range of important legal principles such as procedural fairness and reasonableness in the context of international trade and investment law. Using comparative methodology, the authors examine how those principles are reflected in treaties and how they are employed by adjudicators resolving disputes.

A clear and accessible introduction to one of the fastest growing and most highly debated spheres of international law.

International investment law is one of the fastest growing areas of international law. It has led to the signing of thousands of agreements, mostly in the form of investment contracts and bilateral investment treaties. Also, in the last two decades, there has been an exponential growth in the number of disputes being resolved by investment arbitration tribunals. Yet the legal principles at the basis of international investment law and arbitration remain in a state of flux. Perhaps the best illustration of this phenomenon is the wide disagreement among investment tribunals on some of the core concepts underpinning the regime, such as investment, property, regulatory powers, scope of jurisdiction, applicable law, or the interactions with other areas of international law. The purpose of this book is to revisit these conceptual foundations in order to shed light on the practice of international investment law. It is an attempt to bridge the growing gap between the theory and the practice of this thriving area of international law. The first part of the book focuses on the 'infrastructure' of the investment regime or, more specifically, on the structural arrangements that have been developed to manage foreign investment transactions and the potential disputes arising from them. The second part of the book identifies the common conceptual bases of an array of seemingly unconnected practical problems in order to clarify the main stakes and offer balanced solutions. The third part addresses the main sources of 'regime stress' as well as the main legal mechanisms available to manage such challenges to the operation of the regime. Overall, the book offers a thorough investigation of the conflicting theoretical positions underlying international investment law, testing their worth by reference to concrete issues that have arisen in the jurisprudence. It demonstrates that many of the most important practical questions arising in practice can be addressed by a carefully dosed resort to theory.

This book is a codification of the principles and rules relating to the prosecution of investment claims.

There is a growing interplay between international investment law, arbitration and human rights. This book offers a systematic analysis of this interaction, exploring the role of principles of justice in investment law, comparing investment arbitration with other courts, and examining case studies on human rights and protection standards.
